Plan Overview

A Data Management Plan created using DMPonline

Title: Dummy Plan for API Test

Creator: Michael Evans

Principal Investigator: Michael Evans

Data Manager: Michael Evans

Project Administrator: Michael Evans

Affiliation: F1000

Funder: Health Research Board (HRB) Ireland

Template: Health Research Board DMP Template

ORCID iD: 1234-5678-9101-0000

Project abstract:
  This is the abstract

ID: 83073

Start date: 04-08-2021

End date: 20-08-2021

Last modified: 20-08-2021

Dummy Plan for API Test

Data description and collection or re-use of existing data

How will new data be collected or produced and/or how will existing data be re-used?

this is How will new data be collected or produced and/or how will existing data be re-used?

What data (for example the kind, formats, and volumes), will be collected or produced?

this is What data (for example the kind, formats, and volumes), will be collected or produced

Documentation and data quality

What metadata and documentation (for example the methodology of data collection and way of organising data) will accompany data?

this is What metadata and documentation (for example the methodology of data collection and way of organising data) will accompany data?

What data quality control measures will be used?

this is What data quality control measures will be used?

Storage and backup during the research process

How will data and metadata be stored and backed up during the research process?

this is How will data and metadata be stored and backed up during the research process?

How will data security and protection of sensitive data be taken care of during the research?

this is How will data security and protection of sensitive data be taken care of during the research?

Legal and ethical requirements, codes of conduct

If personal data are processed, how will compliance with legislation on personal data and on security be ensured?

this is If personal data are processed, how will compliance with legislation on personal data and on security be ensured?

How will other legal issues, such as intellectual property rights and ownership, be managed? What legislation is applicable?

this is How will other legal issues, such as intellectual property rights and ownership, be managed? What legislation is applicable?

What ethical issues and codes of conduct are there, and how will they be taken into account?

this is What ethical issues and codes of conduct are there, and how will they be taken into account?

Data sharing and long-term preservation

How and when will data be shared? Are there possible restrictions to data sharing or embargo reasons?

more text

How will data for preservation be selected, and where data will be preserved long-term (for example a data repository or archive)?

more text

What methods or software tools are needed to access and use data?

more text

How will the application of a unique and persistent identifier (such as a Digital Object Identifier (DOI)) to each data set be ensured?

more text

Data management responsibilities and resources

Who (for example role, position, and institution) will be responsible for data management (i.e. the data steward)?

more text

What resources (for example financial and time) will be dedicated to data management and ensuring that data will be FAIR (Findable, Accessible, Interoperable, Re-usable)?

more text
